DETAILED ACTION

Allowable Subject Matter

1. Claims 27 – 46 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 27 – 46 recite, inter alia, a method of calibrating an RTP system, the method comprising the steps of providing at least two calibration wafers, wherein the calibration wafers have differing predetermined reflectivities, successively subjecting each calibration wafer to a simulated thermal treatment comprising heat radiation, determining the temperature of each calibration wafer during thermal treatment using a contact – based measuring device that is in contact with the wafer, measuring radiation emitted from each calibration wafer during the simulated thermal treatment and calculating a set of temperature measurement model parameters to correct temperature measurements based on measured radiation by comparing temperature measurements based on measured radiation to the actual temperature determined using the contact – based measuring device. Although, Crowley, US 4,984,902 and Champetier, US 5,874,711 teach methods for accurate temperature determination by using calibration wafers, they fail to teach the above limitations of the invention. Furthermore, the art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
